**Subject:** RE: Energy Fuels and the White Mesa Mill

Thank you Mark. We don't have any sites shovel ready right now and are primarily in the investigation phase. We did select Energy Fuels as the facility to carry through the full analysis for licensed disposal for the Quivria Mine Site Engineering Evaluation/Cost Analysis.

I forwarded your email to the other dozen or so people working on uranium mines for EPA so they have your contact if they need licensed disposal in the future.

**Subject:** Energy Fuels and the White Mesa Mill

Hi Mark,

We talked with you and others from the EPA and Weston (via conference call back in October) about Navajo Cleanup matters.

More recently, I believe you may have briefly met Mike Neumann from Energy Fuels at the recent Gallup open house.

The purpose of this e:mail is to keep the dialogue going between the EPA and Energy Fuels.

Certainly, we are very interested in keeping our White Mesa Mill (located near the reservation), with our licensed capacity for both uranium recovery (recycle) and disposal, visible for assisting with cleanup on the reservation. I have attached our Statement of Qualifications in this regard.

We would very much like to arrange a meeting in this regard at your earliest convenience. We also would like to again invite you and others to tour the Mill which is located just a few miles South of Blanding Utah.

Feel free to call me directly and/or e:mail back if there is a time for a potential meeting and/or a tour of the Mill.

Regards,

*Energy Fuels Resources (USA) Inc.*
